Results of Examinations:

The questioned typewriting appearing on specimen Q1 most closely corresponds to Laboratory standards for a style of type having a horizontal spacing of 12 characters to the inch. This style of type is found on Smith-Corona typewriters and possibly other brand name typewriters.

The typewriting appearing on specimen Q3 is too limited to classify.

Specimens Q1 and Q3 were searched through the Anonymous Letter File with negative results.

No indented writing was observed on the Q1 envelope.

The submitted specimens have been photographed in the event that future document examinations are requested. These photographs are retained.
